## RIVERSIDE MUNICIPAL EXECUTIVE AIRPORT

Riverside Airport has become the leading destination for corporate and business aviation in Southern California's Inland Empire.

This Region, separate and distinct from the greater Los Angeles area fifty miles to our west, is home to four million people and a \$40 billion annual economy. And the most exciting part is that Riverside Airport is in the center of it all.

With complete landing and navigation systems for all-weather conditions, full conference and catering facilities as well as every level of pilot and aircraft services, this first-class destination is handling the rapidly growing business aviation demands of our region.

Unlike LA basin and coastal airports, Riverside has uncongested airspace, complete local political support, no noise mitigation problems and room for expansion. Easily handling our 110,000 annual flight operations, this tower-controlled field provides immediate entry into the center of Southern California's most exciting region, or a convenient departure point for the Pacific Rim, Mexico, or any other business destination in North America.

Located within the City of Riverside provides the Southern California region with a premier corporate aviation airport.

### Centrally Located:

- 15 flying minutes from Los Angeles and Van Nuys Airports
- 30 flying minutes from San Diego and Palm Springs
- Easy departures to Arizona, Las Vegas, Mexico and the Southwest

### Room to Grow:

- Several Instrument approaches
- Infrastructure in Place
- Radar equipped ATC tower coordinated with SOCAL APP/DEP
- (Runways 5400x1000 and 2850x50)
